# **HF506**

## Metallized Low SIT Film (85°C)

Last update: 16-Dec-2014

#### **DESCRIPTION:**

**Gulf Pack HF506** is a metallized film one side with high purity aluminum and other side heat sealable with a very low seal initiation temperature (SIT) of 85 °C.

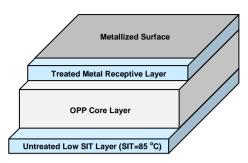

### **PRODUCT FEATURES:**

One side aluminum coated
One side with very low sealing threshold (85 °C)
Excellent metal adhesion & web flatness
Good optical density
Improved barrier to moisture, gas & odors.
Excellent light barrier enhances shelf life
Good resistance to oils, fats & flex cracking

#### **APPLICATIONS:**

Low sealing temperature allow high packaging speed Packaging for moisture & odor sensitive food stuff as coffee, snack food, etc.

Laminate with other substrate

<sup>\*</sup> GPIM - Gulf Pack Internal Method

**Gulf Pack HF506** films comply with EU Regulation 10/2011/EC and USA FDA Code of Federal Regulations CFR21 section 177.1520 (c) 1.1 and are suitable for use in packaging, carrying and transporting foodstuffs.

The information contained in this technical leaflet illustrates typical values only and are to the best of our knowledge. Since the conditions under which our films may be used are beyond our control, such values are declared without warranty or guarantee.

Bi-axially oriented polypropylene films age with time and will exhibit deterioration of some properties if not stored in a suitable environment at a temperature 30°C or below. We strongly advise our customers to use recommended storage conditions and consume products before 3 months from date of production in our plant.

**Gulf Pack HF506** standard surface treatment location is on the outer side (**O**); other treatment preference can be arranged upon agreement with the sales representative before order processing.

Detailed advice regarding other specific applications of Gulf Pack HF506 and other films in the Gulf Pack range is available upon request.
